

Module 2 : Technology

1. Discuss plans for upgrading your technology skills

ANS>> To clear my basic programming concepts, I started a software engineering course. After this, I will take an Android app development course because I'm interested in app development. In the future, I plan to switch from native to cross-platform app development using Flutter because it allows for faster development and a single codebase for multiple platforms.

2. Mention any relevant courses, certifications, or resources you are pursuing.

ANS>> I am currently enrolled in a Diploma in Native Mobile Application from TOPS Technologies. Additionally, I am taking an Android app development course from WsCubeTech on YouTube, and exploring courses on Udemy and Coursera .

3. Share your approach to continuous learning and professional development.

ANS>> I learn through YouTube to stay updated with technologies and trends, and I work on projects for hands-on experience. Additionally, I take online courses for deeper knowledge and engage with developer communities on LinkedIn to network and learn from others.
